GATE PLANNING

What is GATE PLANNING?

GATE PLANNING is a cloud-based scheduling platform that helps warehouses coordinate inbound and outbound traffic with confidence. With customizable workflow, visual planning tools, and real-time tracking, it brings structure to your yard and clarity to your operations.

Why Choose GATE PLANNING?

Faster Turnarounds, Less Waiting

Shorten truck idle time and improve ramp flow with structured slot planning.

Clear Visibility Over Every Booking

Get real-time overviews of what's happening now and what's coming next.

Fewer Errors, More Control

Automated rules and custom workflows reduce manual mistakes and late bookings.

Better Collaboration with Carriers

Everyone sees only what they need — carriers, customers, and warehouse staff stay in sync.

Data-Driven Improvements

Export your data or connect external dashboards to track performance and improve operations.

Quick Launch, No IT Headaches

Fully cloud-based. Start using the platform in hours — no hardware, no installation.

Core Features

Interactive Time Visualization

Experience a dynamic, drag & drop daily planner featuring color-coded time slots. This interactive timeline provides full visibility of gate activities and shift schedules, allowing you to quickly identify conflicts, optimize resource allocation, and adapt to last-minute changes.

Reusable Slot Templates

Automate routine scheduling tasks with reusable slot templates. Create and apply predefined templates for common operational scenarios - be it standard daily shifts or custom customer rules - to ensure consistency, speed up planning, and minimize manual errors.

Real-Time Arrival Tracking

Monitor every phase of each booking with real-time, time-stamped updates—from initial reservation to gate entry and completion. This transparency helps your team quickly detect delays, manage no-shows, and maintain efficient turnaround times.

Booking Rules & Automated Cutoff

Control who can book what — and when. GATE PLANNING lets you restrict slot availability based on carrier, customer, transport type, or process, ensuring each booking follows your operational rules. Combined with flexible cutoff times, the system automatically locks slots after the deadline and cancels unconfirmed bookings to keep your schedule clean and under control.

Custom Workflows & Roles

Tailor booking workflows and define roles to match your specific operational processes. Set permissions and process steps that ensure every team member interacts with the system according to their role.

Carrier & Customer Access

Provide controlled external access for carriers and customers so they can view and book only the time slots relevant to their operations, ensuring data privacy and smoother communication.

Full Booking Audit Trail

Track every change made to a booking — who did what and when. GATE PLANNING logs all updates, status changes, and cancellations with exact timestamps, ensuring full traceability and accountability across your operations.

Booking Data Export & API

Export detailed booking data instantly or connect your BI tools using the built-in API. GATE PLANNING provides full visibility into timestamps, slot usage, and delays — enabling smarter decisions across your operations.

EXTERNAL

Platform Features

Cloud-Based Accessibility
GATE PLANNING operates entirely in the cloud, allowing for access from any location and removing the need for local software installation.

Flexible Authentication Options
The system supports secure login through proprietary accounts with Multi-Factor Authentication (MFA) support, as well as convenient sign-in options via Google and Microsoft accounts.

ISO Certified Security with Daily Backups
Certified under ISO/IEC 27001:2022 — a mark of our commitment to secure and reliable operations. Essential data is secured through automatic daily backups, minimizing the risk of loss and ensuring business continuity.

Smart Add-ons

SMS Communication with Drivers

The system includes full-fledged communication features with carriers and SMS updates for drivers, enhancing coordination and response times.

License Plate Recognition Support

Integration with automatic gate systems is available, utilizing license plate recognition for efficient and secure entry management.

Truck Inspections

Digitally record physical truck inspections — including condition, documentation, or checklist items — at arrival or departure.

Continuously Evolving Platform

Ongoing User-Driven Development
GATE PLANNING is under continuous development, guided by a clear roadmap that incorporates user feedback to ensure it meets the evolving needs of the warehousing and logistics sectors.

Pricing & Plans

Pricing is based on the number of bookings per month and applies **per warehouse instance**. All plans include **unlimited users, slots, and carriers**.

TIER 1	TIER 2	TIER 3	TIER 4	TIER 5
€90 monthly	€225 monthly	€500 monthly	€750 monthly	€900 monthly
up to 100 bookings/month	up to 300 bookings/month	up to 1 000 bookings/month	up to 3 000 bookings/month	up to 10 000 bookings/month
1 GB file storage	2 GB file storage	3 GB file storage	4 GB file storage	5 GB file storage

This pricing is effective as of April 1, 2025.

For clients with over 10,000 monthly bookings, we will create an individual pricing proposal to specifically suit the needs of their instance.

Additional costs

Additional disk storage	€8 per GB
SMS Service availability	€12 monthly
SMS Message	€0,20 per message

Automated usage-based billing

We automatically evaluate the number of bookings made in your warehouse and apply the appropriate pricing tier.

You only pay for what you actually used, so there is no need to upgrade manually or monitor limits.

Try the Demo

Create your own test environment in seconds and experience GATE PLANNING in action. The demo includes sample data and full access to all features, allowing you to test real workflows, booking logic, and user roles.

What you get:

- 30-day access to a fully featured instance
- Pre-filled data and standard configuration
- Immediate setup — no approval or delay
- Perfect for evaluation, internal review, or stakeholder presentations

Start your demo here: **https://launch.gateplanning.com**

Launch Your Production Site

When you're ready to implement GATE PLANNING in your warehouse, we make the onboarding process fast and efficient. No hardware, no IT team required — just a simple setup form.

How it works:

1. **Fill out the setup form** – define your domain, time zone, slot structure, and other preferences
2. **Submit your request** – our team will review and configure your new instance
3. **Track progress** – receive a tracking link to monitor the deployment status in real time
4. **Go live** – once setup is complete, you'll receive all login details and your site is ready to use

Full cloud-based deployment within one business day.

Request your live instance here: **https://launch.test.gateplanning.com/demo**
